## HOCl Generator

RA-1060

Raw Material :  
NaCl / KCl

Available Chlorine :  
100~200ppm(mg/L)

pH Value :  
pH4.0-6.5

Production :  
100~150(L/H)

Power Volt :  
Single Phase 110V/220V

### Greenhouse / Farm / Orchard

In alliance with misting system, the usage of HOCl water to spray behind the leaves to keep pest away and make the inhibit bacterial effect better. That will make crop growth well, and keep crop fresh.

### Inject type misting for fertilizing

The distance and range of spray are widely and the make fertilizing effect better.

### Disinfection / Biosecurity Tunnel System

All-round disinfecting to isolate bacteria from outside and prevent alternate infection.

# TAIWAN AGRICULTURAL MACHINERY MANUFACTURER'S ASSOCIATION

## TAMMA

### Introduction:

The Association was established in 1980. Chaired by Mr. Kenny YANG, the Board of Supervisors is currently in the Fourteenth Term. The Association now has over 300 enthusiastic member companies, and continues to grow year after year. All related manufacturers of agricultural machinery are welcome to join us. Together, we will work hard to bring high-quality products made in Taiwan onto the international stage!

The Association continues to participate in overseas exhibitions and exchanges. Bureau of Foreign Trade, MOEA, grants applications to led delegations to overseas exhibitions in India, Vietnam, Malaysia, Philippines, and Indonesia; together as a team, manufacturers in Taiwan present the "Taiwan Pavilion" that is cleanly designed to showcase all the machines and market Taiwan's agricultural industry, earning popularity and trust among developed countries.

### Outline:

1. Association website provides member companies free portal service and connects all members.
2. Offer overseas referrals and notification and information of related agricultural machinery exhibitions.
3. Overseas Exhibitions: Exhibitors may apply for government subsidy to participate in the Association's activities.
4. Host domestic agricultural machinery exhibition.
5. In 2018, TAMMA bought our own Office in Tamsui, in order to provide our members better service.

## EPC-260 PALM CUTTER

### A Powerful Assistant For Mass Harvesting

- ECO Environmentally Friendly.
- Agricultural Machinery Revolution.
- Zero emissions and low noise.
- Less maintenance needs.
- Easy For Beginners and Female works.

COST SAVING UP TO

75%

Less strength more harvest by special saw blade

5.2Ah BATTERY

Smooth speed control by agile throttle lever

Motor maintenance free

Motor burning out prevention by current overload protection

No air pollution and low noise by electric power

Specially designed Saw Blade for Oil Palm Tree.

- ✓ High Efficiency Motor.
- ✓ Long Motor Life.
- ✓ Robust Steel Motor Shaft.
- ✓ Firm Motor Case.

## From Home Gardening to Essential Tools — Tung Hua / Tung Shiang Ind. Corp. can be Your Personal Expert in Offering Home Life Solution

**T**ung Hua / Tung Shiang Ind. Corp. is one of the long-established professional tool manufacturers in Taiwan, offering a variety of gardening tools including rakes, shovels, hoes, fast joint garden tools, etc. In recent years, they expand their product line to daily necessities sector with sales channels all over the world.

Continuous improvement of technology and products is the key to 40 years of operation. The company mainly undertakes OEM and ODM business, cooperating with internationally renowned gardening tool brands from the United States and Japan to develop high-quality products that meet the needs of international markets. An American customer once sought cooperation to develop new products, saying that the products of Tung Shiang Ind. Corp. are very durable and that service life is one and a half times as much as products of other companies.

Currently, one of the main products, "Fast-Joint-Handle" has obtained patents in four countries. "Fast-Joint-Handle" is combined with replaceable adapters, such as rakes, hoes, pruning saw, etc. In addition to agricultural and horticultural uses, it can also be applied to daily life when combined with special designed brushes for house cleaning. It can even be used for replacing light bulbs, cleaning ceiling fans, and for any works that used to require climbing.

Tung Shiang Ind. Corp. actively attends domestic and international agricultural machinery exhibitions and trade fairs to observe market demand and industry trends, and to seek new inspiration for expanding product lines. Tung Shiang Ind. Corp. believes that apart

from accumulating experience, traditional industries also need to consider the possibility of combining technology with industries. They brought in 3D printing machine and planned professional courses for internal R & D personnel so they could design, make samples and develop new products with high quality more efficiently after recognizing customer needs in the future.

Launching fine products within tools from agricultural equipment, home gardening to daily life sector is one of the core values of Tung Shiang Ind. Corp. They will continue to work hard and be an expert that offers solutions for every customer around the world.

# 2020 Taiwan International Agricultural Machinery and Materials Exhibition

## Taiwan International Agricultural Machinery and Materials Exhibition - Chiayi

Date: October 1-3, 2022

Location: Taizi Boulevard cross with Jiapu East Road, Chiayi City

This exhibition is the largest, most professional and most authoritative agricultural machinery in Taiwan. At the show held in 2020, there were a total of 800 booths in attendance. Delegations and individual visitors came from counties all over the world. It was estimated that 400,000 visitors attended the show. We firmly believe that the 2022 Agricultural Machinery & Material Exhibition will shine even more brightly if you are in attendance!

Welcome to Join with us in this Exhibition !

# Case of Agricultural New Southbound Policy in Taiwan

“Increasing agricultural productivity, sustainability, and safety in region”

The "Agricultural Exoskeleton" provides auxiliary support for the upper arm and waist, respectively, to assist farmers in fruit picking, transporting and other agricultural work that requires high physical strength. It effectively saves more than 50% of muscle strength consumption.

## Features

- Significant labor reduction. No motor or extra carry weight required.
- Adjustable for both men and women.
- Suitable for upper arm operation or field work of trellis crops.
- Powerful support for different muscle parts through auxiliary elements.
- ☑ Wearing Agricultural Exoskeleton for banana harvesting and transporting fertilizer.

☑ Wearing Agricultural Exoskeleton for grape thinning, budding of small tomatoes, arranging the vines, and transporting and shipping.
